Chapter 3 Carbon and the Molecular Diversity of Life Big Ideas. Big Idea 1; All life forms on Earth share biochemical similarities, which is a result of evolution from a common ancestor ... ATP is the primary source of energy for chemical reactions within cells.

Chapter 3 - Conor's E-Portfolio

Chapter 3 (and some of 4): Cells and Cellular Metabolism. Part 1: Overview of Cells, Cell Membrane. Human cells. Basic unit of structure & function. 200 different cell types. Made of C, O, H, N + trace elements. 3 main parts: Plasma membrane. Cytoplasm. Nucleus. Cell diversity. cell structure.

Chapter 3: Cells - Mrs. Swartz's Biology Site

Concentration of sodium ions (Na^+) is greater outside the cell than it is inside, and vice versa for potassium ions (K^+). A neuron at rest has many open K^+ channels, but few open Na^+ channels. As a result, the diffusion of predominantly K^+ creates a resting potential; the inside of the cell is negatively charged, while extracellular material is positively charged.

Chapter 37 - Conor's E-Portfolio - e-portfolio.wight.weebly.com

This chapter will be divided up into 7 parts and completed in 10 days. Here is the overview of the topics covered in this chapter. 1. Organelles 2. Cell Diversity 3. Cellular Transport 4. DNA Replication 5. Mitosis 6. Protein Synthesis 7. Types of body tissue
