Fish (plural: fish) are an aquatic group of vertebrates which live in water and respire (get oxygen) with gills. They do not have limbs, like arms or legs, and they do have digits (fingers & toes). This is a definition which does not quite work: some amphibia also live in water and have external gills, but they are not fish.. Fish used to be a class of vertebrates.

Fish - Simple English Wikipedia, the free encyclopedia

Fish, any of approximately 34,000 species of vertebrate animals (phylum Chordata) found in the fresh and salt waters of the world. Living species range from the primitive jawless lampreys and hagfishes through the cartilaginous sharks, skates, and rays to the abundant and diverse bony fishes.
