### Understanding Flash

Photography: How to Shoot  
Great . . .

Here's a basic set-up using  
manual triggers and manual  
flash: 1. Off-camera flash:  
set-up the main light For  
off-camera flash you'll need  
a light stand, or even a  
tripod, to support... 2. Off-  
camera flash: dial in camera  
settings Set the camera to  
manual mode at ISO 100,  
shutter speed at 1/125 sec  
. . .

### Understanding Flash

How to choose a flash unit.

When you are going to choose a flash, there are some basic factors you should consider:

Knowing in what type of photography you are planning to use a flash.

Understanding the jargon and terms used in flash specifications, so you can objectively compare different flash units.

Finally, find the best price that suits your budget.

Photography power. Each type of studio light has different power capabilities and it is important to understand how to use this power if you want full creative control. This photography class covers all you need to know about flash power, including the relationship between f-stops and studio light power, why it's important (but not necessarily crucial) to have a large range of power and the factors that influence power.

### Understanding Flash

in a studio setting, the two core things learned in this course, How flash works, and how to think about using flash, can be applied when using flash in any setting or shooting environment. You simply need to envision how you want the final shot to look, and then use your flashes, and what they've learned in the course, to achieve the desired effect.
